

Stress Test Quick Reference

Your turn

1. **Untap** lines and talent.
2. **Upkeep:** pay interest; collect Yield (Surplus, or a card from cards that pay in cards); pay Upkeep on treaties and Funding lines in Surplus or discard (the total rounds down); next Saga chapter.
3. **Draw 1.** A Forecast card is shown to the table and can't be run this turn.
4. **Main:** write 1 line (gain Margin); 1 talent move (hire or poach); play investments, treaties, covers; run scenarios; use abilities.
5. **End:** margin call (keep 1 Margin Credit per 10 Surplus); discard to 7; others may run 1 Flash scenario each.

The first-player marker passes left every round.

Money

- **Leverage:** 1 per untapped line, Product or Funding; unspent Leverage is lost.
- **Surplus:** your capital. 0 or less $\Rightarrow$ insolvent.
- **Margin:** +1 Surplus per exposure on a line you write.
- **Hire:** pay Surplus. **Poach:** Hire cost + 2 Surplus; the poached employee gains Non-compete.
- **Liquidate** any time: Sale value as Leverage or Surplus.

Running a scenario

1. Pay Leverage; choose the target if needed.
2. **Dilemma:** each company hit secretly picks Hold or Sell; all reveal at once.
3. **Response window:** left of you first, you last. Responses, tapped talent, liquidation. No responses to responses.
4. **Counter:** the runner pays the listed Leverage or the scenario is cancelled. Act of God can't be countered.
5. **Resolve,** then check insolvency.

Funding lines (banks and funds)

- **Retail Deposits:** Short-Term Rates exposure; a bank run takes half, rounded down.
- **Investor Capital:** Short-Term Equity exposure.
- **Private Credit:** no exposure; Upkeep $1\frac{1}{2}$.
- **Margin Credit:** no exposure; Upkeep 1; margin call at the end of your turn.

Drawing and discarding

Extra draws come from lines you write, Responses you play, and investments or employees at the start of your turn. When a card makes you discard, you choose which cards, face up. An empty deck just stops drawing.

Who gets hit

Each opponent (not you) $\cdot$ **Target opponent** $\cdot$ **Systemic** (you too)

Loss math

Clause amount $\times$ (exposures $-$ hedges, min 0). **x2** counts twice. Nat Cat: Any matches every Nat Cat peril.

Protection order: covers and ignores $\rightarrow$ halving $\rightarrow$ flat reductions $\rightarrow$ swap payments $\rightarrow$ responses and talent $\rightarrow$ XoL cap $\rightarrow$ recoveries.

Insolvency

Auto-sell liquid investments. Still at 0 or less: out. Too Big to Fail makes a failure cost everyone else 5 Surplus.

Table size

Players	2	3	4	5
Starting Surplus	16	18	25	28
Scenario losses	$\times 2$	$\times 1$	$\times 1$	$\times 1$

Game ends after round 10: most Surplus wins.

Keywords

Forecast shown when drawn or searched for, not runnable that turn. **Act of God** can't be countered. **Flash** runnable at the end of another player's turn. **Saga** one chapter now, one per upkeep; turn the card a quarter turn per chapter. **Systemic** hits you too. **Dilemma** everyone hit secretly picks Hold or Sell, then all reveal; the card prices each mix. **Illiquid** can't be sold. **Non-compete** can't be poached. **CEO** starts in play; never poached or fired. **Dark** evidence once in your discard pile; reckonings charge per piece, and nothing removes it.
